

TYPICAL REFERENCES

- **Spot On**, I bought this to treat my farm vehicles, Land Rover, Tractors etc. It is highly effective, the delivery and everything else was spot on. Treats literally thousands of litres of diesel. **By Chris.**
- **Very Pleased With This Product**, worked straight away. Saved me the costly job of having the garage drop my fuel tank down and cleaning it out, highly recommended. **By Jim.**
- **Sorted Out The Problem** very quickly and to maintain the improvements takes only a small amount, I've estimated that 1 litre will last about 70 full tank fill ups **By Luke.**
- **Great Price.** I've been using this for years and have never experienced any biologic growth in my boat fuel tank. When I replaced my old tank after 20 years, the interior was clean. Great price works very well. **By John.**
- **You Gotta Have This.**– I use this religiously on my boat that has twin CATS, I was previously plagued by fuel blockages. However since using the Hydra I have never had a blocked filter. **By Arthur.**
- **Great Product.** We have a diesel bus motorhome, since using Hydra we never worry about fungus and growth developing in our fuel system. **By Bradley.**

Supplied By:

FuelPlus Biocide

**Kills Bacteria, Mould & Fungi
in Fuel Tanks, Lines, Filters**

**Protects Fuel From
Further Biological Attack**

During winter my diesel motor home isn't used for about 6 months, we usually keep the diesel tank full to eliminate any problems with condensation.

Because diesel now contains a percentage of bio diesel, it had unknown to us been creating diesel bugs over the winter period, they caused us to breakdown in within 150 miles of setting off from the Scotland.

The mechanic advised us that we had a clogged primary filter. He replaced the filter and £275 later we were back on the road. He told me that the clog was due to algae that had grown in the tank and recommended I start using Hydra FuelPlus Biocide.

So I bought some and put it in the tank. We travelled about another 150 miles and broke down again, I checked my primary fuel filter cartridge and it was almost clogged again.

I called Hydra's technical help line, their expert explained that my problem was a microbial growth problem and I would have to keep cleaning my primary filter until the dead sludge stopped coming through. He told me that it should soon all be gone and sure one more clean and the system was OK.

*Since then I always use Hydra when I refuel and I have not had a problem since. **By Daren.***

Hydra FuelPlus Biocide Works For You

RAPIDLY DESTROYS MICROBIAL CONTAMINATION IN ALL FUELS

Prevents growth of bacteria, mould and fungi growth in all fuels
Keep fuel fresh, stops fuel tank corrosion & protects engine performance
Suitable for all types of engines and systems

BENEFITS

- AN EFFECTIVE QUICK KILL BIOCIDES
- PREVENTS MICROBE RE-GROWTH
- EFFECTIVE IN FUEL & WATER PHASE
- PREVENTS BLOCKED LINES, FILTERS
- PREVENTS FUEL TANK CORROSION
- COMPATIBLE WITH ALL ENGINES

Water bottom in fuel storage provides a suitable environment for microbes to grow and reproduce. Resulting in contamination of the fuel system which causes a depreciation in fuel quality and consistency. During long term storage this microbial attack leads to fuel degradation, reducing fuel lubricity as fuel additives are broken down by the harmful microbes.

Your cost effective all fuels treatment

POWERFUL BIOCIDES

Hydra FuelPlus Biocide kills microbes completely within 24 hours, keeps protecting the treated fuel for up to 6 months.

Hydra FuelPlus Biocide is based upon dual biocide chemistry and technology that has been proven to be highly effective against microbial growth for over 25 years. It is effective in both the water and solvent phase of diesel fuel ensuring that any microbial growth on the tank walls is destroyed.

FUEL SYSTEM PROTECTION

Hydra FuelPlus Biocide is highly efficient in eliminating heavy microbial infestation from your fuel system and also preventing any future infestation. Biocide usage, maintains the integrity of fuels at all points during storage, distribution and usage. Hydra takes care of the fuel system by preventing engine failures, machine malfunction, microbial induced corrosion and impaired water removal from storage tanks.

DIESEL PARTICLE FILTER

Customers who want to protect their hefty fuel investment, can with Hydra FuelPlus Biocide. It has proven to be the economical solution for improving the quality of fuel and its properties.

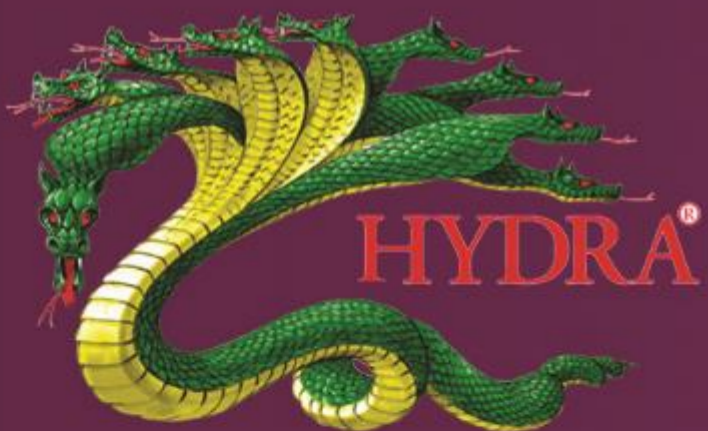

VERY ECONOMICAL

Shock/Initial Dose Contaminated Fuel System
Dilution rate: 1:3000 i.e. 30 ml of biocide per 100 litres of fuel. Will ensure that all problematic bacteria, mould and fungi are eliminated.

Refuelling Dose to Protect Clean Fuel System.
Dilution rate: 1:10000 i.e. 10 ml of biocide per 100 litres of fuel. Treat fuel tanks every time it is topped up.

INTERNATIONAL STANDARDS

All our products are manufactured to the highest international specifications at our UK plant. Which is accredited to ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 this ensures all fuel standards are adhered to.

SUITABLE FOR ALL DIESEL, PETROL & JET ENGINES

Including Cars, Taxis, Vans, Lorries, Coaches, Boats, Tractors, Generators etc.
